System of Arrangement

Records that are responsive to this FOIA request were found in this collection area — Clinton Presidential Records: White House Office of Records Management (WHORM) Subject files, Clinton Presidential Records: Automated Records Management System [Email], Clinton Presidential Records: Electronic Daily Diary. The White House Office of Records Management (WHORM) contains a variety of series created to organize and track documents and correspondence. The WHORM Subject file was compiled by the White House Office of Records Management and is a series of categories designated by a letter/number combination. WHORM files are processed at the document level. The Automated Records Management System (ARMS) is a database that contains email records of the Executive Office of the President. This system maintained unclassified Presidential email. The ARMS database is comprised of six sub-series of email records called "buckets." The buckets generally represent a specific White House office. The buckets are titled: NPR for National Performance Review, OPD for Office of Policy Development, POTUS for President of the United States, WHO for White House Office, CEA for Council of Economic Advisers, and Default for emails not associated with an office. The WHO bucket contains email created or received by individual with an Executive Office of the President White House user account not identified as CEA, NPR, or OPD. The White House Electronic Daily Diary System logs the President’s daily activities as events with participants. Activities include but are not limited to travel, meetings, and telephone calls. Each event was recorded and indexed with a description, a subject code, and start and end time. Electronic Daily Diary records are printed and arranged By Event Type or Search String and there under by date. FOIA 2015-1028-F includes WHORM records from this subject code: TR114 -04 Trips – Honolulu, Hawaii, 11/16-20/94.
