B. Gold dollars of Netherlands Bank transferred from Goldankauf

21 Jan. 1942	*$2,635,000	to Konto GR	(bags 469 of #1298-1842, #1843-1896, #1897-1900)
28 Jan. 1942	** 80,000	to Bankbestand	(# 1901-1916)
5 June 1944	*** 195,000	to Konto GR	(# 2887-2925)

*This is part of a total transfer of $8,295,000 made on this date from the Gold Ankauf to the Konto GR. Additional amounts of gold dollars were subsequently received in the Konto GR (see *** below) no other amounts were removed from this account. On 8 Feb. 45 the balance in the Konto GR, $13,034,000 was packed for shipment to Merkers.

**This is part of a total transfer of $1,440,000 made on this date from the Gold Ankauf to the Bankbestand, making a balance of $4,000,000 in this account. No further change occurred in the Bankbestand account until 8 February 1945 when the $4,000,000 was packed for shipment to Merkers.

***This is part of a total transfer of $1,335,000 made on this date from the Gold Ankauf to Konto GR; bringing the balance in Konto GR to $13,034,000. No further entries were made in this account, and on 8 February 1945 the balance was packed for Merkers.

C. Summary:

From the above tables, it can be seen that practically the entire amount of gold dollars received by the Reichsbank from the Netherlands National Bank was kept in the possession of the bank and is included in the gold sent by the Reichsbank to the Merkers mine in early 1945.

Gold Dollars forming part of looted Netherlands Gold

A

Received by the Reichsbank from Netherlands National Bank

Date received by Reichsbank	amount	*approximate rough weight in grams	*approximate fine weight in grams	Remarks
30 Nov. 1940	$2,348,590	3,924,259	3,531,833	**included in $2,725,000 contained in bags bearing Reichsbank numbers 1296-1842 (see Tresorarbeitsbuch and also Kontelbuch) Received in Gold Ankauf 24 Jan. 41.
17 Jan. 1941	274,960	459,447	413,502	$270,000 of this contained in bags bearing Reichsbank numbers 1843-1896 (see Tresorarbeitsbuch). Received in Gold Ankauf 13 Feb. 1941. (Remaining amount of 4960 Dollars placed in Goldkammer for current needs.)
		known rough weights	known fine weights	
12 Feb. 1941	100,000	167,078	150,370	in bags bearing Reichsbank numbers 1897-1916 (see Tresorarbeitsbuch). Received in Gold Ankauf 3 March 1941.
9 Sept. 1942	204,975	342,470.0	308,223.0	$195,000 of this contained in bags bearing Reichsbank numbers 2887-2925 (see Tresorarbeitsbuch). Received in Gold Ankauf 6 Nov. 1942. (Add. amount of 9475 Dollars placed in Goldkammer for current needs.)

*Approximate weight on basis of known weights of $2,725,000 and $270,000 respectively.

**Each bag contained $5000. This would mean that when the $2,348,590 was placed in bags, there was an odd amount of $3,590. It is impossible to determine whether these $3,590 were added to other dollars to make up a bag or whether they were placed in the Goldkammer to be used for current needs.

[redacted] GUILDERS RECEIVED IN MAY 1943
[redacted] IN NETHERLANDS INDIES ACCOUNT

Date	Amount Dutch Guilders	*Approximate Troy Weight in ounces	*Approximate Fine Weight in ounces	Remarks
29 August 1942	4,700,000	3,379,130.0	4,689,724.6	Dutch Netherlands Guilders on hand in Netherlands Indies Treasury at time of transfer of 45,000,000 guilders (United in separate report).
1 Sept 1942 - 4 Dec 1942	24,875,000	16,672,690.6	14,724,847.4	Dutch Netherlands guilders received in Netherlands Indies Dec. 1942
Total	29,575,000	20,051,820.6	19,414,572.0	

GUILDERS SENT TO PRESIDENT FOR DISPOSITION
FOR SHIPMENT OF FEBRUARY 1943

25 Feb 1943 Withdrawals made to Mint over period of several weeks previous, but only now made on books of Netherlands until requested notes returned to Netherlands	15,000,000	10,078,917	9,998,250	Part of the Netherlands Dutch gilders on 29 August 1942 only insignificant amount of Dutch guilders from other sources on hand, as from Sept. 1942 only negligible amounts received from persons other than Netherlands National Bank.

*Gross weight of bars of this weight less 4 of 1% base for circulation.

Attached is a photostatic copy of the records of the Treasury Dept. reporting this melting of Dutch guilders. It will be noted that the rough weight of the coins used in the melting is shown in the Dept. records to be 10,078,917 grams, a slightly higher total than the actual weight for the 15,000,000 guilders. This can be explained by the fact that these Dutch guilders had not been circulated and hence suffered practically no loss from the mintage weight.

DECLASSIFIED
Authority NND 765012
By SLM NARA Date 6/18/99

REPRODUCED AT THE NATIONAL ARCHIVES

An amount of fine gold (4),512.6 rough grams was added to the coins in order to ensure that the fineness of the bars resulting from the melting would in no case be below 900/1000. Of this fine gold, 30,692.7 rough grams can be identified from Reichsbank records as Helmer deliveries (i.e. 5.5 lots).

The remaining fine gold (10019.9 rough grams) was, according to Reichsbank records, part of an amount of 83,730.9 rough grams which was made up 60% of Helmer deliveries and 40% of Reichsbank bank deliveries.

RESULT OF MELTING

The Mint records show a total of 764 bars weighing 30,116,227 rough grams as resulting from this melting of Dutch guilders.

Reichsbank records identify these bars and give their disposition as follows:

Fineness	Bank Nos.	No. of bars	Rough weight in grams	Fine weight in grams	Remarks
900/1000	2028-2046	19	4,016,294.6	4,230,103.6	Sent to Dutch National Bank, 8 February 1943
900/1000	2047-2021	25	3,350,[illegible].3	3,722,[illegible].7	Sent to Netherlands Indies, 9 February 1943
900/1000	2022-2046	25	3,[illegible].6	3,[illegible].0	Sent to Dutch, 4 February 1943
900/1000	2047-2083	221	29,[illegible].3	32,[illegible].3	Dutch National Bank, 1 April 1943

(smelt numbers of 762 above bars are 2021-2049 according to Mint records)

Vandoleme	3022 (smelt No. 2021/3)	1	4[illegible].3	3[illegible].9	Reichsbank 30 April 1943
Vandoleme	3032 (smelt No. 2029)	1	4[illegible].6	3[illegible].3	Reichsbank 30 April 1943

*The preceding melt in the Prussian State Mint consisted of Reichsmark coins. However, in the Reichsbank records the last part of the Reichsmark bars and the first part of the Dutch guilder bars are grouped together in one skip of 45 bars. It has recently turned out that 38 of these bars belong to the Reichsmark melting and 7 to the guilder melting. The rough weight of the 45 bars is 3,[illegible]3.6 grams, according to Reichsbank records. To fix the approximate weight of the 7 bars it was necessary to have recourse to the Mint records, i.e. to subtract from the total gold resulting from the melting of Dutch guilders, the weights as shown in Reichsbank records, for all other gold resulting from this melt. Thus, an approximate weight of 4,[illegible]4.6 grams was derived for these 7 bars.

**Fine weight of 7 bars is estimated at 4,[illegible]6 grams. This figure obtained by subtracting the average fineness of the remaining 900 type bars of this melt of Dutch guilders, and then applying this fineness (900.2499) to the approximate rough weight of the 7 bars.

Prepared by Mrs. Gill
with the assistance of Mr. Albert Thomas

NETHERLANDS GOLD BARS REMELTED 1942

Date Received by Reichsbank	Type	Amount	Bank Nos.	Rough Weights in Grams	Fine Weights in Grams	Remarks
2 May 1941	Neghaertige	132	33196-33339	1,579,221.5	1,575,165.4	Transferred to BIS Oct 16 1941. * Sold Amkauf Feb 9 1942.

*Recorded in Reichsbank records as sent to Mint for remelting March 19 1942.

*(Deliveries actually made to Mint earlier, but entry not made on books of Reichsbank until remelted metal returned to Reichsbank)

PRUSSIAN MINT RECORDS SHOW THE FOLLOWING:

132 Barren = 1,579,221.5 kg. br. = 1,575,165.4 kgf.

	Smelt Nos.	Rough Weight Before Remelting	No. of Bars	Weight after Remelting
11-2-42	1201	352,694.0	28	338,749
	1202	341,649.0	24	293,590
	1203	357,081.0	29	350,735
	1204	377,346.0	28	346,700
	1205	150,451.5	16	169,510
		1,579,221.5	125	1,519,670

* * * * * * * * * * * * * * * * * * * *

It is believed that 12h of the 125 bars resulting from remelting bars Reichsbank numbers 33776-33899. It is known that one bar bore Reichsbank number 33794. On 23 March 1942 bars 33776 - 33899 were included in a shipment sent to the Swiss National Bank in Berne.

4 gold bars

An amount of fine gold (40,912.6 troy grains) was added to the melt in order to ensure that the fineness of the bars resulting from the melting would in no case be below 900/1000. Of this fine gold, 39,892.7 troy grains can be identified from Bullshark records as Bullion Exploration (Note 5 to Log).

The remaining fine gold (1019.9 troy grains) was, according to Bullshark records, part of an amount of 83,720.0 troy grains which was made up 60% of Bullion Exploration and 40% of Bullshark Ore Exploration.

RESULT OF SMELTING

The Mint records show a total of 762 bars weighing 32,114.27 troy grains as resulting from this melting of Bullshark gold.

Bullshark records identify these bars and show their disposition as follows:

Fineness	Bullshark Nos.	No. of Bars	Gross Weight	Net Weight	Disposition
900/1000	2499-2475	25	1,054.26	1,054.26	Sent to Bullshark Bullion Exploration, 2 February 1945
900 /1000	2474-2451	24	1,012.15	1,012.15	Sent to Bullshark Bullion Exploration, 5 February 1945
900 /1000	2450-2426	25	1,054.26	1,054.26	Sent to Bullshark Bullion, 6 February 1945
900 /1000	2425-2401	25	1,054.26	1,054.26	Sent to Bullshark Bullion, 7 April 1945

(smelt numbers of 762 above bars are 2021-2049 according to Mint records)

Fineness	Bullshark Nos.	No. of Bars	Gross Weight	Net Weight	Disposition
900/1000	2401/2	3	126.5	126.5	Bullshark Bank, 20 April 1945
900/1000	2400/2	3	126.5	126.5	Bullshark Bank, 20 April 1945

*The remaining gold in the remelt date bars consisted of Bullshark coins, bought by the Bullshark Bullion Exploration Bank and the first part of the Bullshark gold bars as stated in the note of 28 June 1945 from the Bullshark Bullion Exploration Bank. 98 of these bars belong to the Bullshark smelting and 200 to the Bullshark smelting. The true weight of the 98 bars is 3,920.0 troy grains according to Bullshark records. In the approximate weight of the 200 bars of the remelting bars received by the Mint amounts to 8,000 troy grains. Deducting 3,920 troy grains from 8,000 troy grains leaves 4,080 troy grains as the approximate weight of the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting. Deducting 4,080 troy grains from 32,114.27 troy grains, the total weight of the 762 bars of the Bullshark smelting, leaves 28,034.27 troy grains as the approximate weight of the 762 bars of the Bullshark smelting. Deducting 28,034.27 troy grains from 39,892.7 troy grains, the weight of fine gold in the Bullshark smelting, leaves 11,858.43 troy grains as the approximate weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting. Deducting 11,858.43 troy grains from 32,114.27 troy grains, the total weight of the 762 bars of the Bullshark smelting, leaves 20,255.84 troy grains as the approximate weight of the fine gold in the 762 bars of the Bullshark smelting. Deducting 20,255.84 troy grains from 39,892.7 troy grains, the weight of fine gold in the Bullshark smelting, leaves 19,636.86 troy grains as the approximate weight of fine gold in the 762 bars of the Bullshark smelting. Deducting 19,636.86 troy grains from 20,255.84 troy grains, the weight of fine gold in the 762 bars of the Bullshark smelting, leaves 618.98 troy grains as the approximate weight of fine gold in the 762 bars of the Bullshark smelting. Deducting 618.98 troy grains from 1,019.9 troy grains, the weight of fine gold in the Bullshark smelting, leaves 400.92 troy grains as the approximate weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting. Deducting 400.92 troy grains from 11,858.43 troy grains, the weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting, leaves 11,457.51 troy grains as the approximate weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting. Deducting 11,457.51 troy grains from 11,858.43 troy grains, the weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting, leaves 400.92 troy grains as the approximate weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting. Deducting 400.92 troy grains from 618.98 troy grains, the weight of fine gold in the 762 bars of the Bullshark smelting, leaves 218.06 troy grains as the approximate weight of fine gold in the 762 bars of the Bullshark smelting. Deducting 218.06 troy grains from 400.92 troy grains, the weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting, leaves 182.86 troy grains as the approximate weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting. Deducting 182.86 troy grains from 218.06 troy grains, the weight of fine gold in the 762 bars of the Bullshark smelting, leaves 35.20 troy grains as the approximate weight of fine gold in the 762 bars of the Bullshark smelting. Deducting 35.20 troy grains from 182.86 troy grains, the weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting, leaves 147.66 troy grains as the approximate weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting. Deducting 147.66 troy grains from 35.20 troy grains, the weight of fine gold in the 762 bars of the Bullshark smelting, leaves 112.46 troy grains as the approximate weight of fine gold in the 762 bars of the Bullshark smelting. Deducting 112.46 troy grains from 147.66 troy grains, the weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting, leaves 35.20 troy grains as the approximate weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting. Deducting 35.20 troy grains from 112.46 troy grains, the weight of fine gold in the 762 bars of the Bullshark smelting, leaves 77.26 troy grains as the approximate weight of fine gold in the 762 bars of the Bullshark smelting. Deducting 77.26 troy grains from 35.20 troy grains, the weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting, leaves 42.06 troy grains as the approximate weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting. Deducting 42.06 troy grains from 77.26 troy grains, the weight of fine gold in the 762 bars of the Bullshark smelting, leaves 35.20 troy grains as the approximate weight of fine gold in the 762 bars of the Bullshark smelting. Deducting 35.20 troy grains from 42.06 troy grains, the weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting, leaves 6.86 troy grains as the approximate weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting. Deducting 6.86 troy grains from 35.20 troy grains, the weight of fine gold in the 762 bars of the Bullshark smelting, leaves 28.34 troy grains as the approximate weight of fine gold in the 762 bars of the Bullshark smelting. Deducting 28.34 troy grains from 6.86 troy grains, the weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting, leaves 21.48 troy grains as the approximate weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting. Deducting 21.48 troy grains from 28.34 troy grains, the weight of fine gold in the 762 bars of the Bullshark smelting, leaves 6.86 troy grains as the approximate weight of fine gold in the 762 bars of the Bullshark smelting. Deducting 6.86 troy grains from 21.48 troy grains, the weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting, leaves 14.62 troy grains as the approximate weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting. Deducting 14.62 troy grains from 6.86 troy grains, the weight of fine gold in the 762 bars of the Bullshark smelting, leaves 7.76 troy grains as the approximate weight of fine gold in the 762 bars of the Bullshark smelting. Deducting 7.76 troy grains from 14.62 troy grains, the weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting, leaves 6.86 troy grains as the approximate weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting. Deducting 6.86 troy grains from 7.76 troy grains, the weight of fine gold in the 762 bars of the Bullshark smelting, leaves 0.90 troy grains as the approximate weight of fine gold in the 762 bars of the Bullshark smelting. Deducting 0.90 troy grains from 6.86 troy grains, the weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting, leaves 5.96 troy grains as the approximate weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting. Deducting 5.96 troy grains from 0.90 troy grains, the weight of fine gold in the 762 bars of the Bullshark smelting, leaves 0.00 troy grains as the approximate weight of fine gold in the 762 bars of the Bullshark smelting. Deducting 0.00 troy grains from 5.96 troy grains, the weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting, leaves 5.96 troy grains as the approximate weight of fine gold in the 200 bars of the remelting bars received by the Mint which belong to the Bullshark smelting. Deducting 5.96 troy grains from 0.00

COIN Market

United States Purchase of Gold

July 5, 1944

MEMORANDUM FOR THE FILES

Subject: Acceptance by Switzerland of a Gold Clause

Reference is made to my memorandum of July 4, 1944 containing the text of a suggested cable to London with respect to a gold clause which the Swiss will be asked to accept. On July 5, Mr. Patton of the State Department called me with respect to this cable. He suggested, since an answer had been received from Bern to FRA's cable of inquiry with respect to the Swiss National Bank's legal liability to accept gold, that paragraph (3) of the cable should be reworded to refer to such an answer. The paragraph will still include our request for the views of the Mission and the British on the proposal that suits might be instituted in Swiss courts to question the title of looted gold.

Mr. Patton informed me that the political people in State objected seriously to paragraph (4), which referred to the fact that attempts on the part of the Swiss to apply the clause against both belligerents could be countered by effective sanctions. State did not believe that either the British or ourselves were in a position where we could threaten the Swiss with such sanctions. He had prepared a redraft of this paragraph moderating it considerably. I suggested that the objective could be attained merely by deleting the sentence referring to sanctions and Mr. Patton agreed to try to get clearance of that change.

With respect to paragraph (5) State believed that the objection to the use of gold to cover representational costs should be made even stronger and suggested the following wording: "In no event should the use of gold by the Germans, even for representational costs or diplomatic expenses be sanctioned as this would tend to compromise the declaration of February 22." The rest of the paragraph, outlining alternative methods of financing such expenditures was retained intact.

The only other question raised was the naming of the Swiss National Bank as one of the entities or persons within Swiss jurisdiction. I informed Mr. Patton that Treasury was willing to agree either to including the name or deleting it and that the question should be discussed with FRA, at whose insistence the bank had been named.

The above changes were cleared with Mr. Richards of Foreign Funds Control and Mr. Metcalf of Legal. Mr. Patton called me the next day and informed me that the cable was being cleared with our changes and

that after discussion with FEA it had been decided to retain the specific mention of the Swiss National Bank. The outgoing cable will be distributed as soon as received.

The incoming cable from Bern (No. 4137, June 29, 1944) with respect to the legal requirements for the acceptance of gold by the Swiss National Bank is being distributed. It contains the categorical statement that "no law or regulation by which SNB is obliged to accept gold was revealed by an examination of the laws and regulations relating to SNB." However, there is still a possible loophole as to the use of gold by Germany, since according to article 4 of the Federal Law on Money of June 31, 1931, everyone has the right to present metals to the confederations for minting and gold once minted is legal tender in full satisfaction of debts. However, acceptance of the suggested clause should shut off the flow of gold from Germany to Switzerland except perhaps through the diplomatic pouch.

As a result of this reply from Bern and the apparent breakdown of the Swiss trade negotiations in London, FEA is now proposing that the attempt to get the Swiss to accept the gold clause be divorced from the War Trade negotiations and be handled separately. A draft of a cable suggesting this possibility and asking for comments as to its feasibility from the Missions and the British will be sent to us for prior clearance. No commitment has been made as to Treasury's position with respect to this proposal.

Gold Declaration

June 24, 1949

Mr. Willis

Mr. Schwartz

There are several as yet unsettled looted gold problems that may come to your attention in connection with your trip abroad. As you know, the three Allied Governments, France, the United Kingdom, and the United States, composing the Tripartite Commission, have had the continued responsibility for the restitution of looted monetary gold and the distribution of the principal amount of the gold recovered to claimant nations. The looted gold program, including the seeking of restitution of gold from neutral countries, is based on the United States Gold Declaration of February 22, 1944, the United Nations Declaration of January 5, 1943, and Resolution VI of the Bretton Woods Conference. The three Allied Governments have a present responsibility to make further efforts to reach settlements for the restitution of looted gold acquired by Portugal and Turkey.

Portugal, it has been established, acquired approximately $48 million of looted gold (Belgian and Dutch), and after two conferences in Lisbon to which O.I.F. sent a representative, no agreement has been reached. The last conference with Portugal in May, 1948 resulted in an offer by the three Allied Governments to accept in settlement of the above claim less than one-third of the total looted gold established as acquired by Portugal. This offer was rejected by the Portuguese in their last note of July 8, 1948. The Allied Governments replied to the Portuguese note and further requested tha the Safe Haven Accord with Portugal be put into effect without waiting a gold settlement. Although further efforts should be made to obtain a satisfactory settlement with Portugal, it is most likely that the three Allied Governments will report to the member countries of the Inter-Allied Reparations Agency Portugal's refusal to reach a settlement under any reasonable terms. It is possible that the Dutch may ask about the failure to settle with Portugal or that England or France may question the delay in completing a report to the country members of IARA. The completion of such a report is, of course, a joint Allied project, and should be handled by the State Department.

Turkey is believed to have acquired approximately $5 million in gold from Germany during the war of which approximately $3.5 million was looted Belgian gold. No settlement has been reached with Turkey.

Two unsettled gold claims before the Tripartite Gold Commission are those of Albania for approximately $1.5 million approved in principal but awaiting further documentation, and a Czechoslovakian claim amounting to approximately $50 million of which a portion has been disallowed and no final decision made on the balance.

The Dutch have considered for some time attempting to recover Dutch looted gold acquired by Switzerland and not covered by the Washington Accord of May 25, 1946. This is a rather involved matter which the State Department has been primarily responsible for. Any questions by the Dutch about the Washington Accord might be referred to the State Department. In addition to these two claims, the Dutch, as far as I know, have not yet received their share of the last allocation. This is being held up pending agreement with the Dutch on certain aspects of the Washington Accord. However, I do not believe that the Dutch have been informed as to why they have not received their share of the last allocation.

May 13, 1942

Mr. White

Miss Fulton

Subject: International gold transactions of the United States, January - April 1942.

1. The monetary gold stock of the United States fell $50 million, January through April 1942, as a result of the release of gold for earmarking. This decline in our gold holdings is a continuation of the downward movement which set in in November 1941 for the first time since January 1934.

2. Since the beginning of 1942 gold held under earmark has increased about $235 million, while our gold imports have amounted to only $130 million.

3. Our gold imports so far this year have been at a four-year low. They have consisted primarily of new production from Western Hemisphere countries, with Canada and Mexico accounting for about $75 and $30 million respectively, or for four-fifths of the total.

4. The only significant decline in earmarked gold was on Dutch account. Earmarked gold held for Javanese and Netherlands governments fell more than $40 million, January through April, reflecting their financing of war purchases.

5. Three countries, Switzerland, Sweden and Argentina, accounted for 90 percent of the net increase of gold held under earmark in this country, with other European neutrals and Latin American countries accounting for practically all of the rest. Gold held under earmark for the account of Switzerland rose $132 million; Sweden's holdings increased $50 million, and Argentina's $32 million. These increases represent a shift from dollar deposits and may be due to a belief that earmarked gold has a preferred legal status over dollar deposits.

Mr. White

Mr. Gunter and Miss Kistler

Subject: How much gold will the United States Treasury acquire in 1941?

It is estimated that the United States Treasury will acquire $1.6 - $2 billion of gold in 1941. Of this amount, only $200 million will be domestically produced. The bulk of the remainder will come from current production outside the United States. The decrease in monetary reserves of foreign gold is expected to be small.

This estimate of $1.6 - $2 billion for 1941 is 50 - 60 percent smaller than the actual acquisitions in 1940, when the United States Treasury acquired $4.3 billion of gold. The sharp decline reflects primarily the exhaustion of reserves of the United Kingdom and the unavailability for sale or export to the United States of gold reserves of German-occupied countries.

Seventy-five percent, or $3 billion, of the gold acquired by the Treasury from foreign countries in 1940 was purchased from the British and French Empires. All but $500 million of this $3 billion represents a net reduction in the gold reserves of three countries -- $1,700 million in the case of the United Kingdom, $700 million in the case of France, and $70 million in the case of Canada.

The British Empire will again be the principal source of our gold purchases in 1941, but unlike 1940, the bulk of the gold purchases will represent newly-mined production. At the close of 1940, the United Kingdom and Canada together held only $440 million of gold. This sets, of course, the maximum which we can receive out of their reserves; because of their reluctance to be stripped of gold, the amount which we will receive may be considerably less.

The outlook is for no material decrease in the reserves of other British Empire countries; their dollar requirements have been assumed by the United Kingdom in return for their dollar receipts. This arrangement, while including receipts from the sale of their newly-mined gold, does not contemplate the pooling or turning over to the United Kingdom of the gold in the monetary reserves of these countries.

Purchases of gold out of monetary reserves of non-British countries are expected to be negligible, unless the United Kingdom, as now seems unlikely, borrows gold from the Allied Governments. First, with respect to those European countries, including German-occupied territories, which have the largest gold reserves outside the United States and the British Empire: This group of countries are cut off from the Western Hemisphere by the British blockade and are prevented from accumulating any considerable deficit with this country requiring settlement in gold. Moreover, the gold of the occupied countries, which is located in the British Empire or the United States, is immobilized for the duration of the war, unless, as indicated above, it is borrowed by the United Kingdom.

The second group of non-British countries are accessible to the United States but their gold reserves are small. These countries may be expected to continue their policy of recent years of limiting their purchases from the United States to their gold and dollar receipts, rather than cutting into their monetary reserves. However, because of the intensification of demand for American goods they may be expected to sell the bulk, if not all, of their newly-mined gold in order to be able to secure as large a quantity of American goods as possible.

To summarize, the production of gold outside the United States in 1941 is estimated at approximately $1,350 million. In addition to acquiring practically all of this gold the Treasury may receive some gold from the monetary reserves of foreign countries. The best estimate which can be made at the present time of foreign gold acquisitions by the United States Treasury in 1941 is $1.4 - $1.8 billion. In addition, approximately $200 million of domestically-produced gold will be sold to the Treasury, bringing the total of gold acquisitions for 1941 to $1.6 - $2 billion.

Gold - acquisitions

February 13, 1941.

Mr. White

Miss Kistler

Subject: Whose gold are we buying?

We know whose gold we are buying in the case of the purchases from Central Banks and Governments by the Stabilization Fund. These purchases account for 60 percent of our gold imports since the outbreak of War. The information is tabulated in convenient form and is available for our use.

The other 40 percent of our gold imports are sold to the Assay Office. Given time and clerks, I think we could determine the ownership (at time of sale to this Government) of the bulk of this gold and the country out of whose reserve it came. The information must be drawn together from three different sets of documents and each particular purchase of gold identified. This is a painstaking and time-consuming job. I estimate it would take four or five clerks a month or six weeks to complete the task.

There are two questions which arise in my mind:

(1) Does any Government agency have information with respect to these shipments which we do not have?

(2) Is the job worth doing?

1. Does any Government agency have information with respect to these shipments which we do not have?

It is impossible to answer this question categorically. Cochran's office reports that they receive all the important facts which the Federal Reserve Bank of New York has with respect to these imports and that they could secure for us any additional information which the Federal Reserve Board has which may be contained in Cochran's daily letter. This is the most likely source of information, since the Federal Reserve Board of New York frequently acts as an agent for foreign Central Banks and Governments and as such are told for whose account the gold is

being sold. For what proportion of Central Bank shipments this information is not reported in the Cochran letters only a careful combing of the files would reveal. It is possible that even if the Federal Reserve Bank does not have any information which we do not have that what they do have may be in much better order than our files.

The Assay Office and Customs are also interested agencies and are possible sources of additional information. I have no idea how or whom should be contacted to explore this possibility.

2. Is this job worth doing?

Yes, in my estimation, for the following reasons:

(a) It will become increasingly important to know whose gold we are buying and how much gold various countries possess. It would be impossible to make any estimates on a moment's notice if the above study is not made, and not to be able to produce such an estimate if asked for might cause us considerable embarrassment.

(b) The problem has far wider ramifications than the mere source of our gold imports. The study would elicit information interesting and useful to various other members of the staff. More specifically it would throw some light upon the question of international business connections. A large number, if not the majority of these gold shipments, are made by commercial banks, business concerns, and even individuals. Furthermore, shipments of gold from England last spring seem worthy of careful examination. A cursory glance at the Consular invoices covering exports of gold from U.K. to U.S. last spring indicates that invoices for these shipments were presented for certification 6 months after the shipments took place and in one instance a woman--Marija Bloomstein--carried $54 thousand of gold in person from England to this country!

(c) All the gold imported from Canada, Australia, and the Union of South Africa and much of the gold coming from England is sold to the Assay Office. Even if it is not considered worthwhile to track down the ownership of all our gold imports it may be desirable to analyze the gold imports from these countries. They account for a large share of the total gold sold to the Assay Office since August, 1939, and the information would fill a corresponding gap in our information.

Mr. White (by Mr. Spiegel)

Subject: Action on Peruvian shipment of gold received from Japan

Mr. White received from the State Department on February 11, 1942, a.m., cable from Lima, Peru, no. 129 of February 10, 1942, asking for instructions respecting a request from the Central Reserve Bank of Peru for certification of a consular invoice covering 52 bars of gold containing 24,707.058691 ounces valued at $864,747.05 excluding shipping charges. The cable also stated that the gold had been received from Japan prior to December 7 and that Minister of Hacienda Basso had stated that he had been informed at Rio by Mr. White that shipment of the gold would be permitted.

Mr. White conferred with other officials of the Treasury including Mr. Bernard Bernstein, Mr. Pehle and Mr. Viner respecting the matter. It was decided there would be no objection to certification of the consular invoice. This decision was then cleared with Under Secretary Bell who approved.

In response to instructions from Mr. White, Mr. Spiegel telephoned Mr. Livesay of the State Department at 2:55 p.m., February 11, 1942, to the effect that a cable along the following lines would be satisfactory to the Treasury.

> "In reply to 129 of 10 a.m., February 10, in view of the assurances of Minister of Hacienda Basso and of other statements made in cables received here to the effect that the gold was received for completion of commercial transactions made prior to December 7, 1941, you are instructed to certify consular invoice covering the amount of gold indicated in the above cable."

Mr. Luthringer, Assistant to Mr. Livesay, called at 3:05 p.m., February 11, 1942, regarding the same matter. He was informed by Mr. Spiegel of the telephone conversation which had just taken place with Mr. Livesay.

Subject: Conference in Mr. White's office, February 11, 1942, on the shipment of $865,000 in gold from Peru to the United States.

Present: Messrs. White, B. Bernstein, Viner, Pehle, Timmons, E. M. Bernstein, Southard.

A meeting was held in Mr. White's office on February 11, 1942, to consider the shipment of $865,000 in gold from Peru to the United States. This gold was received from Japan prior to December 7, 1941. At the Rio meeting, Minister of Hacienda Basso told Mr. White that the gold was shipped from Japan during the summer to liquidate Japanese commercial obligations in Peru. It was agreed to send instructions to have the consular invoice covering this shipment of gold by the Central Reserve Bank of Peru certified in view of the assurances of Senor Basso and the resolutions at the Rio conference.

Copy for FDR

AMERICAN CONSULATE GENERAL

Zürich, Switzerland, January 4, 1941.

800 GERMANY / ITALY

SUBJECT: Information on certain conditions in Germany and Italy.

THE HONORABLE

THE SECRETARY OF STATE

WASHINGTON.

SIR:

I have the honor to report certain information gathered recently from persons who have been in Germany and Italy or from those who have talked with certain German business men who have been in Zürich.

From the above mentioned sources it is evident that the German people are determined and confident of victory although they are unable to understand the resistence of England. It is just as evident that bankers, industrialists and big business in general believe that a Nazi victory will bring no benefits to them but rather to the leaders and others in government, to the army and to labor. Their feelings with regard to the first mentioned group is shown in the twist which is being given in Germany to the word "plutocrat". As the story goes a political leader is made to say that he is a

"cratoplut" - gaining his wealth through power - instead of a plutocrat. In this connection the following is one of the stories which is going the rounds at present in Germany. Von Ribbentrop after taking over the palace which belonged to former President Hindenburg began to furnish it in a very luxurious manner. To begin with he had a full size portrait of himself painted and then decided that he must have a complete gold dinner service. He sent an order to the Reichsbank for the gold which he required. The officials of the bank were disturbed over such a request at this time and after several consultations the directors decided to appeal to von Ribbentrop's reason and common sense and tried to impress upon him just what his request involved. They explained that the amount of gold which he had ordered for his service was sufficient to supply all the dentists in Berlin for a year. Nevertheless von Ribbentrop insisted on his order being filled.

Several Swiss bankers have expressed surprise to me that certain official of the Reichsbank should speak so openly against the Nazi regime to their banking friends when in Zürich. One German banker said that having a substancial balance in his institution means nothing today as it may be wiped out at any time. Hitler's last speech was not reassuring to the business element in Germany. Last week a banker from Germany referred to it in conversation with an important Swiss banker with apprehension. He said that notwithstanding that he

had two sons in the German army he hopes that there will be no early compromise peace because in reality it would be no peace at all as National-Socialism would soon be at war again and expanding its activities beyond Europe. It is believed that there are many Germans in and out of Germany who are opposed to the Nazi regime and who believe that a victory for it would be disastrous to their country. This belief is not confined to the wealthy and to large business interests. However, it is rare for one to obtain an expression of such opinion. Now and then an indiscreet person does so as, for instance, the owner of a small men's haberdashery in Switzerland. I had made a purchase and was about to leave his store when he said: "But you are not British - you are an American". I agreed and he said, as so many now do in Switzerland: "Well, all our hopes are in your country". I replied: "Are you a Swiss?" He answered: "No, I am a German but I have lived in Switzerland for many years and I am a democrat as are many others I know".

While the concensus of opinion is that Germany has sufficient food and raw materials - with the exception of rubber, lubricating oils, copper and a few other basic materials - nevertheless the closing of traffic in the Danube for the winter on 17 December will add to the already difficult rail transportation problems not only for Germany but also for Switzerland.

Germany has recently placed orders in Switzer-

land, according to a reliable Swiss industrialist, for marine engines. This contact received considerable comfort from the fact that his company in manufacturing the engines would be giving no immediate aid to Germany inasmuch as the drawing and approval of plans and specifications and then the construction of the engines will take from 15 to 18 months. In this connection it is no doubt a fact, as rumored, that the large industrial plants in this consular district such as Sulzer Brothers, Limited, Winterthur, A.G. Brown Boveri and Company, Baden, Maschinenfabrik, Oerlikon, and Schweiz. Lokomotiv Maschinenfabrik, Winterthur, are confined almost exclusively in their export trade to the filling of German orders. These plants must either import certain materials from Germany or, as an alternative, close down. To do the latter of course would be disastrous for Switzerland as it would throw many men out of work and create a serious social economic problem.

The same contact stated that it is his understanding that Germany has not all of the necessary materials for the completion of large war ships and therefore is concentrating on the building of small speed craft. Referring to airplane construction in Germany he stated that it is going forward at a high rate of speed but added that the scrapping of a large number of planes, in good conditions but built two or three years ago and now considered obsolete, is going on daily.

The shortage of certain materials required in Italy's war production is considered one of Switzerland best safeguard against a German invasion. From several sources it has been heard that Italy is living a hand to mouth existence with regard to iron, steel, copper, coal, machinery, etc. and is entirely dependent first on Germany for these materials and then on the transportation facilities offered by the Gotthard, Simplon and Lötschberg passes which the Swiss insist will be blown up at the first sign of a German invasion. The expansion and strengthening of fortifications in the mountains of Central Switzerland around these passes which is going on at a rapid rate serves as a symbol of Switzerland's determination to resist any German encroachment.

A manufacturer of shoes in Italy who was in Zürich recently explained that it is with the greatest difficulty that he is able to obtain even reduced amounts of copper which he requires for brass tacks and wire used in the manufacturing of certain kinds of shoes, most of which are for the Italian army. He said that Italy's stocks had been depleted during the time of sanctions and that the country has not been able to build them up properly since that time.

Respectfully yours,

James B. Stewart

Since you have established to your satisfaction Austrian National Bank former possession of 4.7 million dollars worth monetary gold at Salzburg and fact that gold in question did not leave Austria this gold is not subj to transfer to European gold pot under Paris Reparations Act part 3 par 9. You are therefore auth to restore gold to Austrian Govt with appropriate ceremony. Assume informal inquiries will be made whether Austrian Govt prefers restitution now or at later date.

The Austrian National Bank formally declared that they owned $4,743,809 worth of gold now held by US in Salzburg, and stated that the gold never was outside of Austria, but facts at hand indicate that the amount of said gold is much smaller than amount looted from Austrian National Bank (the next few words of message garbled).

Not sufficient evidence available to prove positively the claim, nor is there sufficient evidence to disapprove the claim.

I have no doubt that this gold has been looted by Germany from the Austrian National Bank. Believe restitution of gold by US to Austria in view of US publicized policies would aid Austrian economy and greatly enhance the prestige of the US in Austria, whereas if the gold is not restituted, I would be considerably embarrassed in view of the previous publicity given without my knowledge concerning the restitution of gold.
