Scope and Content Note

The materials in FOIA 2009-0528-F, Segment 2, are a selective body of documents responsive to the topic of the FOIA. Researchers should consult the archivist about related materials. This request is for records relating to the Republic of Korea (ROK), commonly called South Korea; and the Democratic People's Republic of Korea (DPRK), commonly called North Korea. The request was primarily related to U.S-South Korea summit talks and bilateral relations, North Korea's nuclear programs, the advancement of U.S.-North Korea bilateral relations, the South Korean economic crisis in 1997, and U.S.-South Korea mutual defense agreements. Due to the comprehensive nature of the request this collection covers the majority of major U.S.-Korea relations during the Clinton Administration. For a discussion of Korean interrelations, topic background, and general history, please see the finding aid for

System of Arrangement

Records that are responsive to this FOIA request were found in one collection area—Clinton Presidential Records: White House Staff and Office Files. White House Staff and Office Files were maintained at the folder level by staff members within their individual offices and documents all levels of administrative activity. Staff and Office files are processed at the folder level, that is, individual documents are not selected and removed from a folder for processing. While this method maintains folder integrity, it frequently results in the incidental processing of documents that are not wholly responsive to the subject area.

Access

Collection is open to all researchers. Access to Clinton Presidential Records is governed by the Presidential Records Act (PRA) (44 USC Chapter 22, as amended) and the Freedom of Information Act (FOIA) (5 USC 552, as amended) and therefore records may be restricted in whole or in part in accordance with legal exemptions.

Copyright

Documents in this collection that were prepared by officials of the United States government as part of their official duties are in the public domain. Researchers are advised to consult the copyright law of the United States (17 USC Chapter 1) which governs the making of photocopies or other reproductions of copyrighted material.
