6 folders, approximately 189 pages

Summary

This collection consists of records related to Piyush “Bobby” Jindal, who served as the Governor of the State of Louisiana (2008 – 2016). In 1998, Jindal was appointed at the request of Senator John Breaux (LA) to the director of the Bipartisan Commission on the Future of Medicare. The collection contains of email correspondence between White House staff concerning Bobby Jindal and his role as the director of the Bipartisan Commission on the Future of Medicare. This collection also consists of Worker and Visitor Entry System (WAVES) and White House Database (WHODB) records related to the Republic of India Official Dinner September 17, 2000, and event Jindal attended.

Scope and Content Note

The materials in FOIA 2014-0527-F are a selective body of documents responsive to the topic of the FOIA. Researchers should consult the archivist about related materials. Piyush “Bobby” Jindal served as the Governor of the State of Louisiana (2008 – 2016). Jindal previously served as U.S. Representative for the State of Louisiana, President of the University of Louisiana System, and Secretary of the Louisiana Department of Health and Hospitals. Jindal’s graduate and post-graduate field of study focused on issues related to health care. In 1998, Jindal was appointed at the request of Senator John Breaux (LA) to the director of the Bipartisan Commission on the Future of Medicare. Email responsive to this FOIA includes correspondence between White House staff concerning Bobby Jindal and his role as the director of the Bipartisan Commission on the Future of Medicare. This collection also consists of email, Worker and Visitor Entry System (WAVES) and White House Database (WHODB) records related to the Republic of India Official Dinner September 17, 2000 (an event attended by Jindal).

Textual

System of Arrangement

Records that are responsive to this FOIA request were found in the following collection areas –Clinton Presidential Records: Automated Records Management System [Email]; Clinton Presidential Records: White House database (WHODB); Clinton Presidential Records: Worker and Visitor Entry System (WAVES). The White House database (WHODB) is a database of White House events and individuals that attended those events. The database also includes a log of individuals that received White House greeting correspondence. Data was entered and maintained by the Office of Correspondence, Social Office, and Office of Public Liaison. WHODB records are printed and arranged by identification number. The United States Secret Service maintained two databases to monitor entry and access to White House offices: the Worker and Visitor Entry System (WAVES) and Access Control Records (ACR). The WAVES database was used to manage appointments for entry to White House offices. Visitors were issued temporary id badges to monitor their movement around White House offices. WAVES ACR is an access control system that was used to record entry and exit at entry points around White House offices using id/access badges. WAVES records are printed and arranged by traditional WAVES Records or the ACR series and there under chronologically by date. The Automated Records Management System (ARMS) is a database that contains email records of the Executive Office of the President. This system maintained unclassified Presidential email. The ARMS dataset is comprised of 6 sub-series of email records called “Buckets.” The buckets include NPR, OPD, POTUS, WHO, CEA, and Default. ARMS emails are printed and arranged chronologically by creation date. The OPD bucket contains email created or received by an individual with an Office of Policy Development (OPD) White House user account. The WHO bucket contains email created or received by individual with an Executive Office of the President White House user account not identified as CEA, NPR, or OPD. The CEA bucket contains email created or received by an individual with a Council of Economic Advisors (CEA) White House user account. The Default bucket contains email created or received by unknown or un-recognized email accounts. Email found within the Default bucket

often includes email created or received by offices or individuals outside the Executive Office of the President. ARMS emails are arranged by topic, there-under by bucket, and there-under chronologically by creation date.

Access

Collection is open to all researchers. Access to Clinton Presidential Records is governed by the Presidential Records Act (PRA) (44 U.S.C. Chapter 22, as amended) and the Freedom of Information Act (FOIA) (5 U.S.C. 552, as amended) and therefore records may be restricted in whole or in part in accordance with legal exemptions.

Copyright

Documents in this collection that were prepared by officials of the United States government as part of their official duties are in the public domain. Researchers are advised to consult the copyright law of the United States (17 U.S.C. Chapter 1) which governs the making of photocopies or other reproductions of copyrighted material.

Provenance

Official records of William Jefferson Clinton’s presidency are housed at the Clinton Presidential Library and administered by the National Archives and Records Administration (NARA) under the provisions of the Presidential Records Act (PRA).

Processed by
