System of Arrangement

Records that are responsive to this FOIA request were found in these collection areas—Clinton Presidential Records: Automated Records Management System [Email]. The Automated Records Management System (ARMS) is a database that contains email records of the Executive Office of the President. This system maintained unclassified Presidential email. The ARMS database is comprised of six sub-series of email records called "buckets." The buckets generally represent a specific White House office. The buckets are titled: NPR for National Performance Review, OPD for Office of Policy Development, POTUS for President of the United States, WHO for White House Office, CEA for Council of Economic Advisers, and Default for emails not associated with an office. The OPD bucket contains email created or received by an individual with an Office of Policy Development (OPD) White House user account. The Default bucket contains email created or received by unknown or un-recognized email accounts. Email found within the Default bucket often includes email created or received by offices or individuals outside the Executive Office of the President. ARMS emails are arranged by topic, there-under by bucket, and there-under chronologically by creation date.
