Summary

This collection consists of records related to Rafael “Rafi” Eitan. It contains emails and cables with most of the responsive records including material already in the public domain, such as United States Information Agency (USIA) foreign news media summaries, news wire reports, and electronic newsletters regarding Israeli politics.

Scope and Content Note

The materials in FOIA 2019-0638-F are a selective body of documents responsive to the topic of the FOIA. Researchers should consult the archivist about related material. Rafael “Rafi” Eitan (b. 11/1926-d. 03/2019) was an Israeli politician and intelligence officer. He is known for leading the 1960 Mossad operation that captured Nazi war criminal Adolf Eichmann in Argentina and for being unmasked as the “handler” for convicted Israeli spy Jonathan Jay Pollard in the 1980s. This collection consists of cables and emails mentioning Rafael Eitan. Most of the responsive records are material already in the public domain, such as United States Information Agency (USIA) foreign news media summaries, news wire reports, and electronic newsletters regarding Israeli politics.

System of Arrangement

Records that are responsive to this FOIA request were found in these collection areas—Clinton Presidential Records: ARMS Emails, Clinton Presidential Records: TRP Emails, and Clinton Presidential Records: NSC Cable, Email, and Records Management Systems. The Automated Records Management System (ARMS) is a database that contains email records of the Executive Office of the President. This system maintained unclassified Presidential email. The ARMS database is comprised of seven sub-series of email records called "buckets." The buckets generally represent a specific White House office. The buckets are titled: NPR for National Performance Review, OPD for Office of Policy Development, POTUS for President of the United States, WHO for White House Office, CEA for Council of Economic Advisers, NSC for National Security Council, and Default for emails not associated with an office. The NPR bucket contains email created or received by an individual with a National Performance Review (NPR) White House user account. The OPD bucket contains email created or received by an individual with an Office of Policy Development (OPD) White House user account. The POTUS bucket was designated for email created and received by the President of the United States (POTUS). Please note that President Clinton never used his POTUS White House user account to send the few emails he wrote while in office. The WHO bucket contains email created or received by individual with an Executive Office of the President White House user account not identified as CEA, NPR, or OPD. The CEA bucket contains email created or received by an individual with a Council of Economic Advisors (CEA) White House user account. The NSC bucket contains email created or received by an individual with a National Security Council (NSC) user account. The Default bucket contains email created or received by unknown or un-recognized email accounts. Email found within the Default bucket often includes email created or received by offices or individuals outside the Executive Office of the President. ARMS email are arranged by topic, there-under by bucket, and there-under chronologically by creation date. The Tape Restoration Project (TRP) is a database consisting of restored emails from the Automated Records Management System (ARMS) from July 1994 through June of 2000. The TRP is a database that contains email records of the Executive Office of the President. This system maintained unclassified Presidential record email. The TRP database is comprised of the same seven sub-series of email as in ARMS. TRP email are arranged by topic, there-under by bucket, and there-under chronologically by creation date.
