System of Arrangement

Records that are responsive to this FOIA request were found in these collection areas—Clinton Presidential Records: White House Office of Records Management (WHORM) General Files, Clinton Presidential Records: WHORM Alpha Project, Clinton Presidential Records: WHORM Subject Files, Clinton Presidential Records: WHORM (OP), Clinton Presidential Records: WHORM Various Offices, Clinton Presidential Records: White House Staff and Office Files, Clinton Presidential Records: ARMS Emails and Clinton Presidential Records: TRP Emails. The White House Office of Records Management (WHORM) contains a variety of series created to organize and track documents and correspondence. The WHORM Alpha file was compiled by the White House Office of Records Management from 1993 – 1996 and is a series of documents arranged by name of persons, organizations, or events. The WHORM Subject file was compiled by the White House Office of Records Management and is a series of categories designated by a letter/number combination. In addition, there are WHORM, WHORM Counsel, WHORM (CL), WHORM (OP), WHORM (Too Late); WHORM (Various Offices); and WHORM (Alpha Project) series. Staff and Office files were maintained at the folder level by staff members within their individual offices and document all levels of administration activity. Staff and Office files are processed at the folder level, that is, individual documents are not selected and removed from a folder for processing. While this method maintains folder integrity, it frequently results in the incidental processing of documents that are not wholly responsive to the subject area. The Automated Records Management System (ARMS) was a database that contained email records of the Executive Office of the President. This system held, and allowed access to, unclassified Presidential email. The ARMS database was comprised of seven sub-series of email records called "buckets." The buckets generally represented a specific White House office. The buckets were titled: NPR for National Performance Review, NSC for National Security Council, OPD for Office of Policy Development, POTUS for President of the United States, WHO for White House Office, CEA for Council of Economic Advisers, and Default for emails not associated with an office. The Tape Restoration Project (TRP) is a database consisting of restored emails from the Automated Records Management System (ARMS) from July 1994 through June of 2000. The TRP is a database that contains email records of the Executive Office of the President. This system maintained unclassified Presidential record email. The TRP database was

comprised of the same seven sub-series of email as in ARMS. NSC TRP email are arranged by topic, thereunder by bucket, and there-under chronologically by creation date. FOIA 2019-1021-F includes WHORM records from these subject codes: CO079 Iran CO134 Philippines DI002 Natural Disasters FG331 Federal Emergency Management Agency (FEMA) FO Foreign Affairs IV Invitations IV093 Invitations, 1993 IV096 Invitations, 1996 ME001 Messages (sent to Individuals) ME002 Messages (sent to Groups/Organizations) TR201 CO / CA, 7/21 – 23/96.
