Extent

289 folders, approximately 19,401 pages [2 folders / approximately 8 pages of Electronic Records]

Summary

This collection consists of records related to the Digital Divide and National Information Infrastructure (NII). This collection includes articles, booklets, printed cables, Congressional requests, correspondence, printed emails, invitations, maps, policies, press releases, printed web pages and online reports, publications, Presidential remarks, reports, scheduling materials, and talking points. Topics regarding the National Information Infrastructure include the Advisory Council, awards, economic benefits, executive orders, guidelines, intellectual property, intergovernmental political forums, NII initiatives (such as digital libraries, education, electronic commerce, and environmental monitoring), minutes, privacy, the private sector, protecting information infrastructure, Section 1061 of the Defense Authorization Act, and the Task Force. Digital Divide topics include AmeriCorps, conferences and events, disabilities, disadvantaged communities, dot force, the international digital divide, Native American communities, the New Markets initiative, the PowerUP initiative, public private partnerships, access to information technology in schools, site profiles, international cooperation and assistance, and also summits, trips, and tours.

Scope and Content Note

The materials in FOIA 2019-0203-F (Segment 2) are a selective body of documents responsive to the topic of the FOIA. Researchers should consult the archivist about related material. Additional released cases include 2006-0470-F, 2007-0143-F, 2013-0717-S, 2016-0666-S, and 2018-0662-S. This collection contains records related to the Digital Divide and National Information Infrastructure or NII. The High-Performance Computing Act of 1991 identified the need for a National Information

Infrastructure or NII. In February 1993, the Clinton Administration announced its plans to create the White House Information Infrastructure Task Force or NIITF. The Clinton Administration aimed to improve telecommunication networks, computers, and databases to accelerate the development of a NII. In February of 2000, President Clinton announced his digital divide proposal to improve access to education technologies (such as the Internet) for all Americans. This collection includes articles, booklets, printed cables, Congressional requests, correspondence, printed emails, invitations, maps, policies, press releases, printed web pages and online reports, publications, Presidential remarks, reports, scheduling materials, and talking points. Topics regarding the National Information Infrastructure include the Advisory Council, awards, economic benefits, executive orders, guidelines, intellectual property, intergovernmental political forums, NII initiatives (such as digital libraries, education, electronic commerce, and environmental monitoring), minutes, privacy, the private sector, protecting information infrastructure, Section 1061 of the Defense Authorization Act, and the Task Force. Digital Divide topics include AmeriCorps, conferences and events, disabilities, disadvantaged communities, dot force, the international digital divide, Native American communities, the New Markets initiative, the PowerUP initiative, public private partnerships, access to information technology in schools, site profiles, international cooperation and assistance, and also summits, trips, and tours.

System of Arrangement

Records that are responsive to this FOIA request were found in these collection areas—Clinton Presidential Records: WHORM Alpha Project, Clinton Presidential Records: WHORM Subject Files, Clinton Presidential Records: WHORM (OP), Clinton Presidential Records: White House Staff and Office Files, Clinton Presidential Records: ARMS Emails, Clinton Presidential Records: TRP Emails, and Clinton Presidential Records: NSC Cable, Email, and Records Management Systems. The White House Office of Records Management (WHORM) contains a variety of series

created to organize and track documents and correspondence. The WHORM Subject file was compiled by the White House Office of Records Management and is a series of categories designated by a letter/number combination. In addition, there are WHORM (OP) and WHORM (Alpha Project) series. Staff and Office files were maintained at the folder level by staff members within their individual offices and document all levels of administration activity. Staff and Office files are processed at the folder level, that is, individual documents are not selected and removed from a folder for processing. While this method maintains folder integrity, it frequently results in the incidental processing of documents that are not wholly responsive to the subject area. The Automated Records Management System (ARMS) was a database that contained email records of the Executive Office of the President. This system held, and allowed access to, unclassified Presidential email. The ARMS database was comprised of seven sub-series of email records called "buckets." The buckets generally represented a specific White House office. The buckets were titled: NPR for National Performance Review, NSC for National Security Council, OPD for Office of Policy Development, POTUS for President of the United States, WHO for White House Office, CEA for Council of Economic Advisers, and Default for emails not associated with an office. In 2022, the National Archives and Records Administration transferred the majority of Clinton ARMS and TRP records to a records management and access system called ERA. This changed the processing of ARMS and TRP records. For technical reasons, however, NSC emails remained in their own bucket. NSC ARMS emails are arranged by topic, there-under by bucket, and there-under chronologically by creation date. The Tape Restoration Project (TRP) is a database consisting of restored emails from the Automated Records Management System (ARMS) from July 1994 through June of 2000. The TRP is a database that contains email records of the Executive Office of the President. This system maintained unclassified Presidential record email. The TRP database was comprised of the same seven sub-series of email as in ARMS. NSC TRP email are arranged by topic, there-under by bucket, and there-under chronologically by creation date. FOIA 2019-0203-F (Segment 2) includes WHORM records from these subject codes: BE Business - Economics BE003 Industry BE004 National Economy CO009 Armenia ED Education FE005 Management Improvement Program FG001 President of the United States FG001-07 Appointments Granted, Presidential FG001-08 Presidential Telephone Calls FG006-01 White House Office FG006-04 Counsel to the President FG006-20 National Economic Council FG020-06 United States Advisory Council on the National Information Infrastructure FG065 Independent Agencies, Boards and Commissions

FG258 Task Forces FG509 President’s Committee of Advisors on Science and Technology, 11/23/193 FG535 President’s Commission on Critical Infrastructure Protection FG538 President’s Information Technology Advisory Committee, PITAC (Changed by EO) FG999 Federal Agencies, Proposed FI010 Taxation IV Invitations MC003 Briefings – Conferences, White House PE002 Employment - Appointments PR013 Presidential Favors, Requests for PU001-07 Clippings to the President RS Reports - Statistics SC Sciences SP Speeches TR Trips UT001 Communications - Telecommunications.

Access

Collection is open to all researchers. Access to Clinton Presidential Records is governed by the Presidential Records Act (PRA) (44 U.S.C. Chapter 22, as amended) and the Freedom of Information Act (FOIA) (5 U.S.C. 552, as amended) and therefore records may be restricted in whole or in part in accordance with legal exemptions.

Copyright

Documents in this collection that were prepared by officials of the United States government as part of their official duties are in the public domain. Researchers are advised to consult the copyright law of the United States (17 U.S.C. Chapter 1) which governs the making of photocopies or other reproductions of copyrighted material.

Provenance

Official records of William Jefferson Clinton’s presidency are housed at the Clinton Presidential Library and administered by the National Archives and Records Administration (NARA) under the provisions of the Presidential Records Act (PRA).

Processed by

Staff Archivist, 2023. Previously restricted materials are added as they are released.
