Summary

This collection consists of records related to antitrust laws, antitrust exemptions, Department of Justice Antitrust Division, mergers, small business, small farms, tobacco, baseball strike, and domestic airlines. This collection includes briefings, correspondence, legislation, memoranda, notes, press clippings, press releases, publications, resumes, and reports.

Scope and Content Note

Antitrust is a set of laws and regulations designed to promote fair competition in the marketplace by preventing monopolies, price-fixing, and other anti-competitive practices, ensuring a level playing field for businesses and protecting consumers from unfair prices and limited choices.

This collection contains records regarding antitrust laws, antitrust exemptions, Department of Justice Antitrust Division, mergers, small business, small farms, tobacco, baseball strike, and domestic airlines. This collection includes briefings, correspondence, legislation, memoranda, notes, press clippings, press releases, publications, resumes, and reports.

System of Arrangement

Records that are responsive to this FOIA request were found in these collection areas—Clinton Presidential Records: WHORM Subject Files, Clinton Presidential Records: WHORM (OP), and Clinton Presidential Records: White House Staff and Office Files.

The White House Office of Records Management (WHORM) contains a variety of series created to organize and track documents and correspondence. The WHORM Alpha file was compiled by the White House Office of Records Management from 1993 – 1996 and is a series of documents arranged by name of persons, organizations, or events. The WHORM Subject file was compiled by the White House Office of Records Management and is a series of categories designated by a letter/number combination. In addition, there are WHORM, WHORM Counsel, WHORM (CL), WHORM (OP), WHORM (Too Late); WHORM (Various Offices); and WHORM (Alpha Project) series.

Staff and Office files were maintained at the folder level by staff members within their individual offices and document all levels of administration activity. In the Staff and Office files of Sarah Wilson and David Apol there were 3.5” diskettes containing various files. The materials from these diskettes have been processed electronically and are available for research in an electronic format. These files are referred to as assets. Staff and Office files are processed at the folder level, that is, individual documents are not selected and removed from a folder for processing. While this method maintains folder integrity, it frequently results in the incidental processing of documents that are not wholly responsive to the subject area.
