System of Arrangement

Records that were responsive to this FOIA request were found in three collection areas – Clinton Presidential Records: WHORM Subject Files, Clinton Presidential Records: Staff and Office Files, and Clinton Presidential Records: ARMS Emails. As policy, Staff and Office files are processed at the folder level, that is, individual documents are not selected and removed from a folder for processing. While this method maintains folder integrity, it frequently results in the incidental processing of documents that are not wholly responsive to the subject area. WHORM Subject and WHORM Alpha files are processed at the document level. The WHORM Subject file was compiled by the White House Office of Records Management and is a series of categories designed by a letter/number combination. A complete listing of the categories with detailed descriptions is provided in our research room. The Automated Records Management System (ARMS) is a database that contains email records of the Executive Office of the President. This system maintained unclassified Presidential record email. The ARMS dataset is comprised of 6 sub-series of email records called “Buckets.” The buckets include NPR, OPD, POTUS, WHO, CEA, and Default. ARMS emails are arranged chronologically by creation date.
