Scope and Content Note

The materials in FOIA 2010-1301-F are a selective, not necessarily all inclusive, body of documents responsive to the topic of the FOIA. Researchers should consult the archivist about related materials. FOIA request 2010-1301-F contains material pertaining to correspondence between First Lady Hillary Rodham Clinton and Muhammad Yunus; correspondence to/from Grameen Bank; microcredit/micro development. The WHORM Subject Categories contains one subject file category. The category contains correspondence and some news clippings. The White House Staff and Office Files contain records from the First Lady's Office, including reports, correspondence, background material on various microcredit and microenterprise organizations and foundations, background material on various White House microcredit and microenterprise initiatives, and background material on U.S. participation in the United Nations Fourth World Conference on Women (and its microcredit and microenterprise initiatives), among other materials.

System of Arrangement

Records that were responsive to this FOIA request were found in three collection areas – Clinton Presidential Records: WHORM Alpha Files, Clinton Presidential Records: WHORM Subject Files, Clinton Presidential Records: Staff and Office Files. The White House Office of Records Management (WHORM) contains a variety of series created to organize and track documents and correspondence. The WHORM Subject File was compiled by the White House Office of Records Management and is a series of categories designated by a letter/number combination. In addition there are WHORM, WHORM Counsel, WHORM (CL), WHORM (OP), WHORM (Too Late), WHORM (Various Offices), and WHORM Alpha Project series. The WHORM Alpha file was compiled by the White House Office of Records Management and is a series of documents arranged by name of persons, organizations, or events. White House Staff and Office Files were maintained at the folder level by staff members within their individual offices and documents all levels of administrative activity. WHORM files are processed at the document level; whereas, Staff and Office Files are processed at the folder level, that is, individual documents are not selected and removed from a folder for processing. While this method maintains folder integrity, it frequently results in the incidental processing of documents that are not wholly responsive to the subject area.
