**System of Arrangement**

Records that were responsive to this FOIA request were found in two collection areas –Clinton Presidential Records: Staff and Office Files, and Clinton Presidential Records: Automated Records Management System (ARMS) emails. As policy, Staff and Office Files are processed at the folder level, that is, individual documents are not selected and removed from a folder for processing. While this method maintains folder integrity, it frequently results in the incidental processing of documents that are not wholly responsive to the subject area. The Automated Records Management System (ARMS) is a database that contains email records of the Executive Office of the President. This system maintained unclassified Presidential Records email. The ARMS dataset is comprised of 6 sub-series of email records called “Buckets.” The buckets include NPR, OPD, POTUS, WHO, CEA, and Default. ARMS email are arranged chronologically by creation date.
